This list is based on the *Fortune* 1000 list of companies published by *Fortune* magazine in the April or May of each year. The number and rank of companies remains unchanged throughout the year until a new list is published. We update our list throughout the year whenever a woman becomes CEO or departs a CEO position at any of the listed companies. Women are counted in our list starting on the date they officially take over their positions. We strive to keep this list accurate and timely; if you have found that we have missed something, or have any questions, please email us at ic-info@catalyst.org.

Catalyst also maintains an historical list of women CEOs that have appeared on the *Fortune* list. If you would like a copy of the list, email ic-info@catalyst.org

This list was last updated February 1, 2012.
